

Atlas Copco Environmental Management System

Atlas Copco has developed and established requirements for an Atlas Copco Environmental Management System. This system is based on legal compliance, environmental training, reduction of energy consumption, reduction of environmental impact and continuous improvement.

Atlas Copco Mfg. Korea Co., Ltd. Yongin Customer Support Center Korea

Has been reviewed and audited and found to conform to these requirements. By issuance of this certificate this facility represents that it will maintain its EMS in accordance with Atlas Copco Group environmental requirements.
